

AURALiC ARIES G2.2

DIGITAL STREAMER

The AURALiC ARIES G2.2 streamer is the culmination of nearly a decade of dedicated research and development. Enhanced with a quad-core processor boasting 64-bit architecture, this streamer delivers an unprecedented eightfold increase in power compared to its predecessor. Also, its DMA (Direct Memory Access) technology achieves up to 90% reduction in jitter and latency.

Purer Power

Equipped with the innovative Purer Power supply and featuring galvanic isolation throughout, AURALiC's ARIES G2.2 effectively safeguards the audio signal from interference. The incorporation of a nickel-plated copper case as a shield further ensures optimal performance by minimising electrical noise infiltration. Offering a range of output options including coaxial, optical, XLR, and USB, along with the Lightning Link for seamless communication with compatible DACs,

the ARIES G2.2 streamer exemplifies versatility and connectivity. Complemented by the user-friendly Lightning DS app, the ARIES G2.2 allows for convenient library setup and access to online streaming services. Its impeccable and clear reproduction of high frequencies ensures a sublime listening experience. Impressively surpassing its predecessor, the ARIES G2.2 streamer unveils a wealth of musical detail, enriched image scale, and enhanced depth.

In our test, we found the streamer also has exceptional noise reduction, heralding a new era of revealing hidden musical details. AURALiC's rapid evolution is evident in the ARIES G2.2 streamer, a testament to its remarkable growth and unwavering commitment to excellence. Boasting a powerful build quality, intuitive functionality, and excellent sonic performance, this streamer rightfully secures its place among the elite in the realm of digital audio.
